Hope Within Ministries

When there is no other place to turn to,
Hope Within is there.

Providing holistic primary healthcare,
mental health services, and related education
for low-income individuals in Dauphin,
Lancaster and Lebanon counties.

-  Physical exams and wellness/
preventative care for families
-  Acute and chronic disease
management
-  On-site laboratory work
-  Referrals, when needed, for radiology,
lab work analysis, and specialist visits

**Please help us raise \$450,000 to build a
new counseling center and expand our
healthcare delivery capacity.**

Visit www.hopewithin.org for details.

Visits hosted by Hope Within
Community Health Center in 2017

1,742 medical visits

537 counseling visits

How We Help

Hope Within fills a gap in our community.
It offers a safety net for people who make
too much to qualify for Medicaid, but not
enough to be able to afford insurance.

Hope Within Ministries supports the working
poor so they can continue to work and
support their families without being
burdened by poor health or medical debt.

**Offering early access
to physical and mental
healthcare SAVES!**

Preventive care at Hope Within saves
healthcare dollars, avoids the cost burden
of lost work, and helps to minimize the
stresses that harm families, marriages,
and lives.

This access to care is made possible thanks
to a strong base of volunteers who provide
care, and the generosity of our community
and healthcare partners. Additionally,
patients are offered free medications,
on-site laboratory testing and EKGs.
Patients have access to free additional labs
that are sent out as well as basic radiology
and ultrasound services through our
partnership with local healthcare
organizations.

The Need Continues to Grow

To meet the growing needs of the community, Hope Within seeks to expand the number of people it serves, but is limited due to space constraints. This limitation is especially true with the counseling program.

The counseling program has grown annually since its inception in 2014, but it is limited by the availability of only one counseling room for three part-time counselors.

Numerous federal, state and local health assessments relay a lack of primary care and mental health services for low-income individuals served in our region.

What We Do Every Day

Last year, we conducted a routine prostate-specific antigen (PSA) screening for Jim*. His PSA level came back elevated. Due to the potential for prostate cancer, we immediately referred him to a urologist. Three months later, he was back in our office and his PSA blood level came back elevated again.

After our caring staff discussed the severity of the matter with him, we learned that due to the cost of the visit, Jim never went to the urologist.

Our team found ways to help him pay

Hope Within Can Meet this Need

Hope Within Ministries can address the needs in the community.

- 🔥 Provide **more comprehensive and integrated care** for their patients and clients
- 🔥 **Increase the capacity of the mental health/counseling program**, especially for
 - 🔥 Those with dual diagnoses of mental health needs and substance use disorders and,
 - 🔥 Those entrapped in the sexual exploitation industry
- 🔥 Foster **stronger partnerships with related organizations** to accomplish the above objectives

How does Hope Within get there?

With bold vision & committed people.

for the urologist visit. We persisted, and we are thankful that Jim went. He needed surgery, and we were able to get him on short-term medical assistance to help cover the cost.

Jim now sees the need for a healthier lifestyle, and through Hope Within referrals, he has seen a dietician, athletic trainer and optometrist.

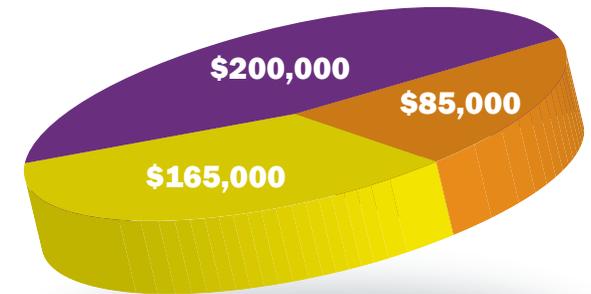

Because of the generosity of our community, Hope Within Ministries was there to help Jim. Jim is on a much healthier path and will be able to continue working to support his family.

The Community's Help Is Needed to Make It Happen

To meet these strategic objectives, a Capital Campaign goal of \$450,000 has been established.

Here's how the funds will be allocated:

\$165,000 for construction of the counseling wing, allowing Hope Within to deliver services to more counseling clients and more healthcare patients

\$85,000 to boost cash reserves to cover the increase in services created by the expansion of the Counseling Services Program

\$200,000 to retire the present mortgage and free operating funds for the expansion of services

Help Us Achieve Our Goal with a Donation

The mission of Hope Within Ministries is to show God's love to people in need through the provision of high quality professional health care, sound counsel, and related education.

How You Can Participate

Your help is needed to bring this dream to life. Please consider investing in the future of Hope Within Ministries and in the physical and mental well-being of our neighbors in need.

A donation to the Hope Within Ministries is an investment in transforming the lives of those we serve. It is an investment in a healthier community.

Several naming opportunities have been established for leadership level donations and pledge payments may be made at the frequency of your choosing.

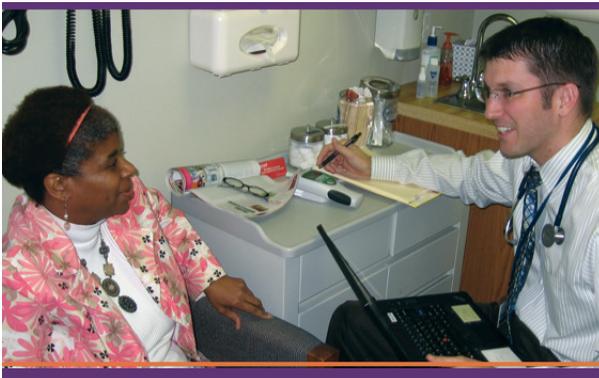

We envision a community where no one is turned away and everyone can receive the care they so desperately need.

The Hope Within Community Health Center expansion project will do just that for our community.

Be a part of this effort.

Visit www.hopewithin.org for details or complete the pledge card.

Your generous consideration and support is so deeply appreciated.

An Example of the Growing Need for Integrated Care

“Not a day goes by that I am not eternally grateful for those who donate financial resources and volunteer personal time and talents to make this ministry a beacon of hope for the local community.”

Sarah* never would have imagined starting over as an unemployed, single mother at the age of 50. But there she was. She had no access to affordable healthcare and felt completely lost. Her faith was waning, and she was about to give up.

Thankfully, during this time of grieving and rebuilding her life, Sarah was referred to Hope Within.

Now, eight months later, she is much healthier both physically and emotionally.

Sarah didn't just need free health screenings and someone to talk to, she needed integrated care that addressed the whole person and let her become the new Sarah.

This is the need in our community. It is a growing need that we are challenged to meet ... every day.
